

One Teacher

One Teacher. Many Grades. One AI Companion.

The offline-first AI teaching assistant built for India's 1 lakh+ single-teacher government primary schools.

Investor Pitch · 2026

THE PROBLEM

India's silent classroom crisis

1L+

Single-teacher
primary schools

33L+

Students taught
by one teacher

7.5L

Primary teacher
vacancies

One teacher simultaneously manages 3–5 grades, multiple subjects, attendance, mid-day meals, and FLN goals — with almost no time left for differentiated teaching.

EkAdhyapak Sahayak

An offline-first AI companion that multiplies what one teacher can do in a multi-grade classroom.

1

Multi-grade Lesson Plans

One topic → differentiated activities for Grades 1–5 in under 60 seconds

2

Differentiated Worksheets

3 difficulty levels from the same concept, ready to print or use orally

3

FLN Oral Assessments

Quick 8–10 min checks a teacher can run while other groups work

4

Daily Timetable Helper

Realistic schedule that shows where the teacher's attention should be

Designed for zero-friction adoption

01

Open

Single HTML file works
offline on any phone or
laptop

02

Fill

Topic, grades present,
subject, language — 15
seconds

03

Generate

Copy optimized prompt
→ paste into free AI
(Grok / Gemini)

04

Teach

Ready materials in
under a minute,
reviewed by the teacher

A massive, underserved public-education segment

Total Addressable

1.1L+

Single-teacher schools in India

Serviceable

30K+

Schools in high-need states (JH, BR, UP, MP, RJ)

Beachhead

5–8K

Pilot districts + NGO partners
Year 1–2

Aligned with NEP 2020, NIPUN Bharat (FLN), and state digital education missions. Existing platforms (DIKSHA, Shiksha Copilot) do not solve multi-grade differentiation for single-teacher schools.

Public-good first, sustainable second

Government / SSA

- District & state licenses
- Bundled with teacher training
- Per-school or per-block pricing

NGO & CSR

- Partnership deployments
- Impact measurement dashboards
- Funded pilots in high-need clusters

Future Layer

- Premium offline model packs
- Local-language fine-tunes
- Analytics for block officers

Land with teachers, expand through systems

Phase 1

0–6 mo

Teacher-first pilots

500–1,000 teachers in 2–3 districts · WhatsApp + offline HTML · FLN outcome feedback

Phase 2

6–18 mo

District & NGO scale

Partner with SCERT / SSA / large NGOs · Integrate with DIKSHA · Block-level training

Phase 3

18–36 mo

State & language expansion

State-level procurement · 5+ Indian languages · Lightweight offline AI packs

WHY THIS WINS

Built for the real constraints of the classroom

Offline-first by design

Works with intermittent or zero internet — the reality of most single-teacher schools.

Teacher remains the expert

AI generates; teacher reviews, adapts, and stays in full pedagogical control.

Multi-grade native

Not a single-grade tool stretched to fit. Parallel activities are the default.

FLN & NEP aligned

Direct support for Foundational Literacy & Numeracy and NIPUN Bharat goals.

Zero device lock-in

Any browser, any phone. No app store, no login wall, no data extraction.

Public-good DNA

Open starting point, designed to integrate with DIKSHA and state systems.

From idea to deployable product

Working prototype

Full offline HTML tool + prompt library live on GitHub

Repo public

github.com/mahadevaiahrashmi/EkAdhyapak-Sahayak

Design validated

Grounded in UDISE+ data, Sahayak/Shiksha Copilot learnings, multi-grade pedagogy

Next 90 days

Teacher pilots, Hindi-first UX polish, first NGO/district conversations

THE ASK

Seed support to reach 5,000 teachers

Seeking early partners & capital

To run structured pilots, build Hindi + 2 regional language packs, and establish the first district & NGO distribution channels.

40%

Teacher pilots & training

30%

Product & language
expansion

20%

Partnerships & GTM

10%

Operations & measurement

Every child deserves a teacher who has time to teach.

One Teacher gives that time back.
